Tryout date _____

TO DO	3 NIGHTS OUT	2 NIGHTS OUT	NIGHT BEFORE	DAY OF	AFTER THE ICE
SLEEP	☐ 9.5 hrs (10+ ideal). Set the bedtime from wake-up time.	☐ 9.5 hrs again, fully locked in.	☐ 9.5 hrs minimum. The one that shows up on the ice. ☐ Alarm set with time to wake, eat, and move.	☐ Up with time to spare.	☐ Another skate tomorrow? Tonight is a night before again: 9.5 hrs.
SCREENS	☐ Off 1 hr before bed . ☐ Under 4 hrs total today.	☐ Off 1 hr before bed. ☐ Under 4 hrs total today.	☐ Off 1 hr before bed. Phone charges outside the room. ☐ Under 4 hrs total today.	☐ Phone away between skates. Feet up, quiet spot.	☐ Off 1 hr before bed.
WATER	☐ 3 L minimum , sipped through the day.	☐ 3 L minimum.	☐ 3 L minimum. ☐ Bottles filled for tomorrow.	☐ Big glass first thing. ☐ Bottle full in the box, sipping not chugging. ☐ Refill after every skate.	☐ Keep drinking through the evening.
FOOD	☐ Three real meals. Nothing new this week.	☐ Three real meals, nothing new.	☐ Full, hearty, balanced dinner: protein, starch, veg, normal fats. ☐ Snacks for before / between / after packed.	☐ Familiar breakfast: mostly carbs, some protein, fats light. 2 to 3 hrs pre-ice if you can. ☐ Between skates: fuel by the gap (page 2).	☐ The big meal: carbs + protein + fats. Fats come back here (fish, avocado, cream sauce).
MOVE	—	—	—	☐ Morning mobility 10 to 15 min (routine 1). ☐ At the rink ~45 min early. ☐ Off ice warm-up 20 to 30 min before the ice (routine 2). ☐ Cool-down right after each skate (routine 3).	☐ Cool-down done (routine 3).
BAG & LOGISTICS	—	☐ Confirm ice times, rink, drive time. Know when you leave. ☐ Gear check: broken, missing, or needs a sharpen gets fixed today.	☐ Skates sharp, spare laces ☐ Helmet/cage, shoulders, elbows, gloves, pants, shins, jock, neck guard, mouthguard ☐ Jersey + socks (both colours) ☐ Sticks taped + spare stick ☐ Tape roll, scissors, wax ☐ Own water bottle(s) ☐ Off ice kit: shoes, shorts, tee, layer ☐ Snacks + shaker ☐ Towel, guards, paperwork ☐ Clothes laid out, bag by the door	☐ Bag in the car. ☐ Between skates: gear off, feet up, rest.	☐ Repack for tomorrow if there's another skate.

The whole week in one line: sleep 9.5 plus, 3 litres of water, screens off an hour before bed, nothing new, warm before the ice, cool down after, fuel by the gap, and eat big once the skating is done.

1 • MORNING MOBILITY

Two rounds through. Smooth and easy, this wakes the body up and loosens stiffness, not a hard stretch.

1. Dynamic hip flexor stretch each side
2. Dynamic frog stretch
3. Plate tea cup 6 each side, a small plate or water bottle works
4. Dynamic pigeon stretch each side
5. Wide leg seated forward fold
6. Superband dislocates 6, a towel works with no band
7. T-spine rotation with reach each side
8. Side-lying IT band stretch each side
9. World's greatest stretch 5 each side
10. Seated hip twist 5 each side

2 • OFF ICE WARM-UP

One round, in order, about 10 m of hallway. Build the pace as you go, the last three should feel fast.

1. Shuttle run 10 m
2. High knee skipping 10 m
3. Runner stretch 4 each side
4. Inchworm walk 5
5. Down dog toe tap to push-up 4 each side
6. 90-90 hip switch to lift & reach 4 each side
7. Push-up to T-rotation 3 each side
8. Pogo hops 10
9. Single leg lateral pogo hops 5 each leg
10. Glute bridge 5, with a 2 second hold at the top
11. Double broad jump 3
12. Backpedal to sprint 2 reps: 5 m back, 10 m forward

3 • POST SKATE COOL-DOWN

Two rounds through, about 10 minutes, right after each skate. Keep every stretch gentle so the tissue can recover.

1. Cat-cow 4
2. Thread the needle 3 each side
3. Dynamic hip flexor stretch each side
4. Dynamic pigeon stretch each side
5. Rear foot elevated hip flexor stretch each side
6. Side-lying IT band stretch each side
7. Dynamic frog stretch
8. Straddle side stretch 3 each side, easy

FUEL BETWEEN SKATES

More than one ice time in a day? What to eat is decided by one thing: how long until the next skate. Fats take a back seat until the evening.

Under 2 hours: a little easy digesting protein and a light carb, keep fats low. Whey or your protein powder in water, Fairlife, or skim milk. A banana or a few dates alongside. Small, not a meal.

2 to 4 hours: carbs first, plus some protein. Fresh fruit (pears, bananas, oranges), dried fruit (dates, raisins, apricots), bread or toast with honey or jam, plus Fairlife, yogurt, or a shake. Then the 2 hour snack as the next skate gets close.

4 hours or more: a full meal, fats still low. Chicken or turkey, a starch like pasta, rice, or quinoa, and vegetables. Then the 2 hour snack as it gets close.

After the ice: the big one. Skating's done, so it's all recovery: carbs, protein, and fats together. Fish, avocado, a cream based sauce on the pasta. Get a lot of good food in.
